

# Neuroscience Testing Internship

IDUN Technologies Ltd. is a swiss based ETH-Spinoff founded in November 2017. At IDUN, our vision is to usher in the next evolution in IoT, evolving it into the Internet of Humans: in which our bodies drive, actively and passively, our experience with our wearable devices, and we have actionable data about ourselves. We have a holistic understanding of all aspects in the pipeline between the body and IoT experience. For more details please visit [our website](#).

## The Opportunity

We are seeking a Neuroscience Testing Intern that combines good know-how with the ambition to leave a mark on our company and the world.

Do you want to build the world you want for yourself and society instead of trying to fit into the one that has been already created? This is opportunity we can offer at the intersection between humanity and connected device evolution.

## Your background

- BSc / MSc in Psychology, Neuroscience, or similar
- Experience with study designs and study conduction
- Ideally previous experience with EEG and/or BCIs
- Basic knowledge of Python and/or Matlab

## Key Responsibilities (include but are not limited to)

- Support the neuroscience department
- Plan, conduct and evaluate data collection
- Collect findings and conclusions and summarize & present them on a regular basis to the team
- Maintain and grow a library of documentation that articulates clear protocols for EEG testing

## Mindset

- Able to work under pressure to meet internal and external deadlines
- Ability to work independently and to carry out assignments to completion within parameters of instructions given, prescribed routines, and standard accepted practices
- Team player and communicative, must be able to apply received and to provide feedback
- Must be able to work independently and to have good time management skills
- Passion for neuroscience and technology
- Analytical thinking – realize obstacles and prepare strategies to overcome

You will be the expert in your field with the freedom and responsibility to make your own decisions aligned with your department and the company's vision. We work very well with people embracing opportunities and building their own team and structure to drive the company's success. We will care for you and your happiness at IDUN and we will listen to your inputs.

Please send your application (letter of motivation & CV) to: [hr@iduntechnologies.ch](mailto:hr@iduntechnologies.ch)
